DETAILED ACTION

1. This application has been examined. This action is in response to a preliminary amendment filed March 11, 2004. Claims 1-20 have been cancelled and claims 21-25 have been added. Claims 21-25 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 21-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Larsen. Larsen clearly shows a “bubble-cap “ distribution device in which the tray is a riser tray. See Figure 1. Vanes configured as “chevron-type vanes” 16 are shown in Figure 2. These vanes are clearly perforated.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patents Nutter, Witzel, and Woerbeide et al are cited as showing particular swirl device configurations including perforations, and chevrons (two patents), respectively. The applicant's prior patent is of particular interest.
